PURCHASING POWER EMERGENCY!

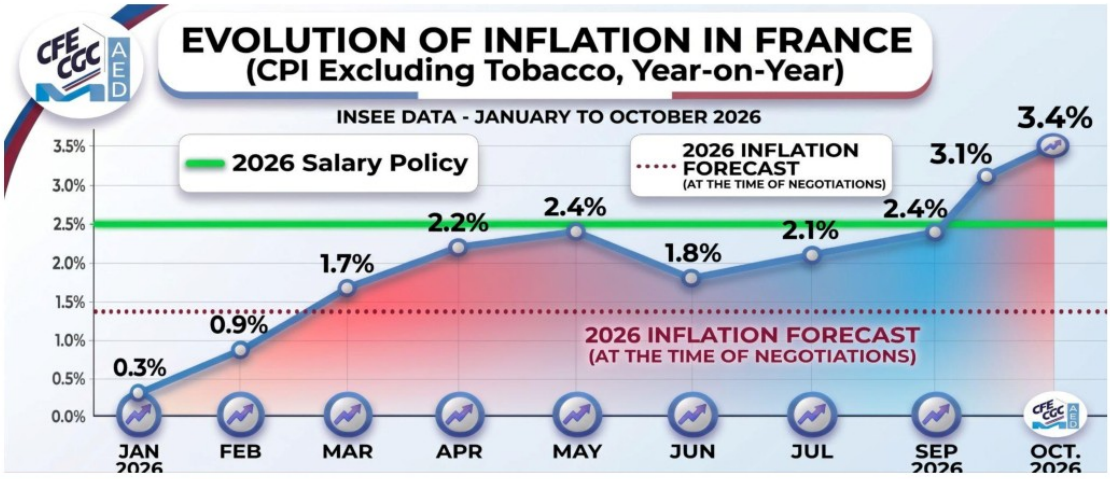

The CFE-CGC is mobilizing all over France to defend people's purchasing power and taking part in the demonstrations of November 5th 2026. This campaign must serve to influence the decisions of the government, industry sectors and companies in order to secure a response to the demands regarding employees' purchasing power.

CFE CGC AED Airbus

Our trade union shares the legitimate and persistent concerns of employees, and those at Airbus in particular, on this issue. It is essential that employees' purchasing power remains at the heart of our priorities, at a time when preparations are underway for the 2027 salary negotiations.

The **CFE-CGC** is calling Airbus Management **to fulfill its key responsibility** in light of the current situation. Given the Airbus Group's **sound financial position**, it must not treat wage restraint as a sacred cow but, on the contrary, **provide the necessary resources to match the scale of the challenges and expectations.**

What are we talking about when we talk about inflation?

The CFE-CGC is calling for **a supplementary payment** in the form of **a general pay rise, identical in percentage**, for **all employees** without waiting for the 2027 salary policy negotiations.
This demand, put forward at the negotiation meeting of November 4th 2026, is all the more **legitimate** given that **it is underpinned by the review clause included in the 2026 - 2027 salary policy agreement.**

In parallel, the **CFE-CGC** demands the **revaluation of the HMW** (Hierarchy Minimum Wage) **grid on January 1st 2027** for all classification levels.
During the negotiation meeting of November 4th 2026, **Airbus Management proposed an average increase in the HMW of 1.2%.**
The CFE-CGC, considering this proposal insufficient, demanded an increase in the average rate, with a focus on classes which are decoupling from the UIMM grid of less than 8%.

Next meeting on November 9th 2026

We have so much
in common
